DETAILED ACTION

This is a notice of allowability. Claims 1-6 are cancelled.
Claims 7-13 are pending.

Allowable Subject Matter

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with A. Preis on 8 May 2008.

Claim 7, line 14 amend "said process comprising at least one of," to "said process comprising the steps of,"

Claim 7, line 16 amend "of said section" to "of said section,"

Claim 11, lines 5 and 6, amend "polypropylene and polyethylene" to "polypropylene, polyethylene and polybutylene terephthalate."

Claims 7-13 are allowed.

The following is an examiner's statement of reasons for allowance:

Per Claim 7, the prior art of record fails to disclose the process of preparing a hollow composite where the process comprises both the steps of molding thermoplastic material on at least a portion of the exterior surfaces of said section, said molding by injection under pressure sufficient to cause at least one part of the said section to plastically deform, thereby fixedly attaching the parts of said section together, and molding thermoplastic material onto at least a portion of the exterior surfaces of said section, said molding by injection under pressure sufficient to cause at least a portion of said section to plastically deform against at least a portion of said support element, thereby fixedly attaching said support element to at least one part of said section. While the prior art cited does disclose parts of the member being made through injection molded processes, the prior art fails to teach that the injection molding has enough pressure to plastically deform the section members as a process for attaching the section members together. In noting the UK patent issued to Rowe (GB 2 350 655 A), the reference discloses the process of attaching two members

Art Unit: 3635

using a thermoplastic and pressure. Yet the Rowe reference does not disclose molding a thermoplastic under pressure to deform section materials to attach both parts of a section together and to attach the section to the support element. Additionally, the Rowe reference is for the attachment of the longitudinal ends of tubular members to maintain a tubular shape, and the remaining prior art of record does not involve the connection of the longitudinal ends of the members. Last the prior art of record does not disclose the structural limitations of the hollow chamber and support element with a thermoplastic material molded on it to meet the limitations as claimed, and to incorporate another reference to add material (such as a thermoplastic) and deform the apparatus using the process as claimed are not taught or otherwise disclosed.

Claims 8-13 depend from Claim 7 either directly or indirectly.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
